SUMMARY

Senior Software Engineer with 9+ years of software development experience across backend engineering, web applications, APIs, cloud infrastructure, telecom platforms, fintech, e-commerce, and distributed systems. Strong hands-on expertise in PHP, Laravel, Symfony, Node.js, Python, React, Vue.js, AWS, Docker, Kubernetes, and CI/CD. Proven track record of owning complex features end-to-end, improving system performance and reliability, integrating third-party platforms, and collaborating with distributed engineering teams across international environments.

Experience

Senior Software Engineer November 2023 – Present
Baltic Exchange (via SAQAYA) *Remote*

- **Project: Baltic Data Platform (BDP) V1 & V2**
  - **Description**: Developed and enhanced Baltic Data Platform, a market data platform supporting benchmark submission workflows and maritime data operations
  - **Responsibilities**: Developed backend services, REST APIs, AI-powered features, scalable application components, and contributed to frontend development
  - **Tech Stack**: Python, FastAPI, React, AI/LLM Technologies, REST APIs, Docker, Cloud Services

Senior Software Engineer December 2021 – October 2023
XM *Cyprus (Remote)*

- **Project: Promotions Engine**
  - **Description**: Symfony-based API and React dashboard for marketing campaigns
  - **Responsibilities**: Upgraded Symfony 5.4 → 6, collaborated with DevOps
  - **Tech Stack**: Symfony 6/5.4, React, Node js, Typescript, Terraform, New Relic,Aws(s3,Lambda, EC2, cloudfront), Kubernetes, Docker

Senior Software Engineer December 2019 – November 2021
Sulfah *Saudi Arabia*

- **Project: Microfinance Portal**
  - **Description**: Vue.js dashboard + Laravel API for loan management
  - **Responsibilities**: Developed ACL for role-based access, redesigned auth flow
  - **Tech Stack**: Laravel, Vue.js, OAuth2, Node js

Senior Software Engineer January 2018 – November 2019
Pentavalue *Egypt*

- **Project: MEDawi (Pharmacy App)**
  - **Description**: Mobile app for medication reminders and tracking
  - **Responsibilities**: Developed backend APIs, implemented push notifications
  - **Tech Stack**: symfony, Firebase
- **Project: ServU (Technician Booking)**
  - **Description**: On-demand service booking platform
  - **Responsibilities**: Built booking engine, integrated payment gateway
  - **Tech Stack**: React Native, Symphony

Web Developer July 2016 – December 2017
Fekra Computers *Egypt*

- **Projects: Khabar News Platform**
  Business Applications
  - **Description**: Developed and maintained web-based applications including content management systems and internal business solutions
  - **Responsibilities**: Designed backend features, developed database-driven modules, implemented APIs, optimized application performance, and supported production systems
  - **Tech Stack**: PHP, Laravel, Symfony, MySQL, JavaScript, HTML/CSS, REST APIs

Projects

TAS (Accounting/ERP) | *Laravel, Nodejs, HTML, MySQL, AWS EC2, Vue.js* 2024
- Developed a multi-tenant accounting and ERP platform supporting customer accounts, business workflows, and financial operations
- Implemented e-invoice integration features and supported API-based financial transactions

Giftit | *Laravel, Nodejs, HTML, MySQL, AWS EC2, Vue.js* 2023
- Led development activities, designed features, and delivered required application functionality
- Integrated application components, improved workflows, and enhanced system usability

Ewysh (Zone1 Side Project) | *Laravel, Node.js, React, MySQL, AWS* 2023
- Led development activities, designed features, and delivered required application functionality
- Integrated application components, improved workflows, and enhanced system usability

Zone1 | *Laravel, HTML, MySQL, AWS EC2, AWS RDS, JavaScript* 2021
- Led team to develop multi-tenant ecard system
- Developed ecard sending engine to send over 10,000 emails for recipients
- Meat clients to present the application

Telgani - Car Rental Platform | *Laravel, React* 2021
- Developed backend services and APIs for a scalable vehicle booking and rental platform
- Optimized database queries and improved application performance

Brimore - Go-To-Market Platform | *Laravel, React* 2021
- Developed backend services supporting supplier, customer, and transaction workflows
- Implemented business logic and API integrations for platform operations

Sabq Newspaper | *Laravel, Symfony, MongoDB* 2020
- Migrated MongoDB data structures into JSON format and prepared content integration for the new CMS

Trustsec | *PHP, WordPress* 2019
- Developed and customized a WordPress-based e-commerce website for security product sales

Education

Ain Shams University Egypt, Cairo
Bachelor of Computer and System Engineering *Aug. 2012 – May 2016*

Technical Skills

Languages: PHP, Node.js, Python, Go, SQL (Postgres, MySQL, NoSQL), JavaScript, TypeScript, HTML/CSS, C/C++
Frameworks: Laravel, Symfony, Phalcon, CodeIgniter, Django, Vue.js, React, Next js
DevOps: Git, Docker, Kubernetes, AWS, Jenkins, Terraform, CI/CD
CMS: WordPress, Shopify, Magento
AI & Generative AI: Large Language Models (LLMs), Generative AI Applications, Prompt Engineering, OpenAI API, AI-powered Application Development, Retrieval-Augmented Generation (RAG), Vector Databases, LangChain, AI Agents
Others: ELK, Grafana, RabbitMQ, Redis, New Relic
